### PACKING MACHINE KL

The machine can be used with automatic weighing machines, measuring cups, manual feed conveyors, and screw conveyors. These packaging solutions are widely used to package a variety of dispersed granular, lumpy, strip and powder products such as pasta, snacks, seeds, bread, fruit, seasonings and flour.

#### Features

- Low cost, high return, controllable speed and efficiency.
- Famous brand PLC control system, large touch screen, easy to operate.
- Servo motor film system, pneumatic control level sealing.
- It can use different measuring equipment to complete the entire packaging process, including feeding, measuring, filling, sealing, date printing, gas filling (exhaust), counting, and finished product delivery.
